HSRI LECTURE SERIES

PRESENTS

DR. MELBOURNE HOVELL, PHD, MPH

“The Behavioral Ecological Model: A guide for real time measures and real time interventions”

Dr. Melbourne Hovell is the founder of the Division of Health Promotion, and a Professor of Public Health at San Diego State University. He is also the founding director of the Center for Behavioral Epidemiology and Community Health (CBEACH). Dr. Hovell follows the Behavioral Ecological Model focusing his studies on etiology of health-related behavior which address influences of change establishing healthy lifestyle practices in whole populations.

Friday, April 19th at 1:00pm
Classroom and Office Building Room 265
